PERSONAL PROFILE

Applied mathematician and data scientist with a specialisation in data visualisation, cartography, network analysis and mathematical modelling. Originator of the go-cart.io project, which makes cartogram generation easy and user-friendly. Internationally experienced educator at the undergraduate and postgraduate level.

ACADEMIC POSITIONS

<i>Current</i> SINCE JUL 2015	Yale-NUS College (Singapore): Assistant Professor <i>Mathematical, Computational and Statistical Sciences</i> Yale-NUS is a selective liberal arts and science college. I supervise undergraduate research culminating in “Capstone Projects” in the students’ senior year. Many projects have led to peer-reviewed publications. I also teach and design modules for the “Common Curriculum” and specialised elective courses.
JUN 2015 – NOV 2013	Hungarian Academy of Sciences (Budapest): Marie Curie Fellow <i>Institute of Technical Physics and Materials Science</i> Independent research in statistical physics, network analysis and game theory.
OCT 2013 – SEP 2012	University of Bristol (UK): Lecturer <i>Department of Engineering Mathematics</i> Independent research in applied mathematics. Lecturer for undergraduate and postgraduate courses.
AUG 2012 – DEC 2009	Imperial College (London): Junior Research Fellow <i>Mathematics Department</i> Independent research in complexity and network science. Lecturer for postgraduate courses.
NOV 2009 – MAY 2008	Carl von Ossietzky Universität, Oldenburg (Germany): Research Fellow <i>Institute for Chemistry and Biology of the Marine Environment</i> Mathematical modelling of bioinvasion mediated by the network of cargo ships, supported by a Computational Science Fellowship of the Volkswagen Foundation.
MAY 2008 – OCT 2005	Santa Fe Institute (USA): Postdoctoral Fellow Independent research in complex systems and interdisciplinary science.

QUALIFICATIONS

AUG 2005 – SEP 2000	University of Michigan (USA): Ph.D. <i>Physics Department</i> Advisor: Prof. M. E. J. Newman Thesis: “Spatial distributions—density-equalizing maps, facility location, and two-dimensional networks”
JUL 2000 – OCT 1997	Albert-Ludwigs-Universität Freiburg (Germany): Vordiplom <i>Physics Department</i> Average mark: 1.0 (best possible mark on a scale from 1.0 to 6.0)

SELECTED PUBLICATIONS

See page 10 for complete publication list

- | | |
|-------------------------------------|--|
| INTERACTIVE
CARTOGRAMS | <p>I. K. Duncan, S. Tingsheng, S. T. Perrault and M. T. Gastner
 Task-based effectiveness of interactive contiguous area cartograms
 <i>IEEE Trans. Vis. Comput. Graph.</i> 27(3):2136–2152 (2021)
 DOI: 10.1109/TVCG.2020.3041745</p> <p>Cartograms are map-based data visualisations in which the area of each map region is proportional to an associated numeric data value (e.g. population or gross domestic product). Because of their distorted appearance, cartograms are sometimes criticised for being difficult to read. We conducted an experiment to evaluate whether cartograms are more legible if they are accompanied by interactive animations, linked brushing and infotips. We found that interactivity has the potential to make cartograms accessible even for those readers who are unfamiliar with interactive computer graphics or do not have a prior affinity to working with maps.</p> |
| FAST
CARTOGRAM
ALGORITHM | <p>M. T. Gastner, V. Seguy and P. More
 Fast flow-based algorithm for creating density-equalizing map projections
 <i>Proc. Natl. Acad. Sci. U.S.A.</i> 115(10):E2156–E2164 (2018)
 DOI: 10.1073/pnas.1712674115</p> <p>Prior to this publication, cartogram algorithms had generally been cumbersome or slow. Here we described and benchmarked a new algorithm that can compute cartograms in a matter of seconds.</p> |
| NETWORK
ANALYSIS | <p>P. Kaluza, A. Kölzsch, M. T. Gastner and B. Blasius
 The complex network of global cargo ship movements
 <i>J. Royal Soc. Interface</i> 7(48):1093–1103 (2010)
 DOI: 10.1098/rsif.2009.0495</p> <p>The global network of merchant ships plays a crucial role in human mobility, the exchange of goods and the spread of invasive species. We used information about the itineraries of cargo ships in 2007 to construct and analyse the network of links between ports.</p> |
| DIFFUSION
CARTOGRAM
ALGORITHM | <p>M. T. Gastner and M. E. J. Newman
 Diffusion-based method for producing density-equalizing maps
 <i>Proc. Natl. Acad. Sci. U.S.A.</i> 101(20):7499–7504 (2004)
 DOI: 10.1073/pnas.0400280101</p> <p>We presented a technique to create cartograms based on a physics-inspired model in which a spatial density undergoes Fickian diffusion. As the density equilibrates, it creates a velocity field that defines a continuous map projection. The cartogram is constructed by applying this map projection to the vertices of the multipolygons that represent the geographic regions.</p> |

TEACHING EXPERIENCE

Data Analysis and Visualization with R

Yale-NUS College (2021, 2019, 2018, 2016)

This course teaches how to use the programming language R for data analysis and visualisation. Starting from the fundamentals of R, students learn how to write their own R programs. Hands-on instructions show how to speed up programming with the integrated development environment RStudio and the Tidyverse suite of R packages. Real-world data sets are used to demonstrate how to extract information and present it effectively (e.g. as networks or geographic maps). This course applies the pedagogy of team-based learning with an emphasis on giving and receiving feedback through peer review.

Quantitative Reasoning

Yale-NUS College (2020, 2019, 2017, 2016)

This “Common Curriculum” course aims to develop the students’ skills in logical and statistical reasoning so that they become critical and informed readers of quantitative data. Students learn to criticise and question empirical claims, support them with logical arguments and address real-life problems by gathering and visually representing quantitative data. The course applies the pedagogy of team-based learning to ensure that students who bring diverse talents and backgrounds to the course can learn together and from each other.

TEACHING EXPERIENCE (CONTINUED)

Monte Carlo Simulations in Science and Statistics

Yale-NUS College (2017)

This course teaches how to write elegant and efficient Monte Carlo simulations for concrete real-world examples. Students also learn the theoretical foundations of pseudorandom number generators, Markov chain Monte Carlo methods and the Metropolis-Hastings algorithm.

Stochastic Processes and Models

Yale-NUS College (2017, 2016)

In this course, students learn the mathematics behind the most common models of stochastic processes: Markov chains, Poisson and renewal processes, and queuing theory. Students learn how to prove the most important mathematical results and apply them to realistic problems.

Evolutionary Game Theory

Eötvös Loránd University, Budapest (2014)

In this course, students learn basic concepts of evolutionary game theory: payoff matrix, pure and mixed strategies, different notions of equilibria and their stability.

Engineering Mathematics

University of Bristol (2013)

This two-semester course aims to bring all students entering the Faculty of Engineering up to a common standard in mathematics. The course contains those elements of classical engineering mathematics that universally underpin the formation of the professional engineer. Topics include algebra, analysis, calculus, differential equations, probability and statistics.

Networks: Theory and Applications

Imperial College London (2011)

This course introduces the mathematical theory of networks with applications to social networks, the Internet, transportation and biology. Topics include graph theory, algorithms and mathematical models of networks, especially random graph models. The objective is to develop the mathematics of network-driven processes (e.g. traffic flows, epidemiology and web search engines) and apply the theory to real data.

I have also taught the following courses.

- *Statistical Computing*, Yale-NUS College (2016)
- *Statistical Programming*, Yale-NUS College (2015)
- *Network Flow Algorithms*, University of Bristol (2012)
- *PhD school “Networks and Medical Imaging”*, University of Namur, Belgium (2012)
- *Stochastic Spatial Models in Ecology*, Imperial College London (2012)
- *Mathematics I for Civil Engineers*, Imperial College London (2012)
- *Networks Winter School*, University of Warwick (2011)
- *Biological Modelling*, Universität Oldenburg, Germany (2008)
- *Graduate Workshop in Social Science*, Santa Fe Institute, USA (2006)
- Graduate Student Instructor, University of Michigan (2001–2003)
 - Introductory Mechanics and Sound Laboratory
 - Introductory Electricity and Light Laboratory
 - Elementary Laboratory II (Electricity and Magnetism)

AWARDS AND FELLOWSHIPS

Yale-NUS College Annual Research Recognition Award (2021)

Awarded for faculty-student collaboration.

Student recipients: Ian K. Duncan and S. Tingsheng (S\$ 5000 research grant + S\$ 500 prize for each recipient)

FP7 Marie Curie Fellowship (2013–2015)

Competitive intra-European fellowship (total support: € 184,000)

AWARDS AND FELLOWSHIPS (CONTINUED)

Imperial College Junior Research Fellowship (2009–2012)

Independent fellowship that aims to select world-class early-career researchers through a rigorous three-stage review process in open competition (total support: £ 122,000)

Computational Science Fellowship of the German Volkswagen Foundation (2009)

Independent fellowship that supports junior researchers in theoretical and computer-based disciplines, selected by an international review panel (total support: € 201,000)

Wirt and Mary Cornwell Prize (2004)

Awarded to Ph.D. students who have “demonstrated greatest intellectual curiosity, given most promise of original study and creative work” (\$10,000 cash award)

Postdoctoral Fellowship, Santa Fe Institute (2005–2008)

Highly competitive fellowship that aims to “prepare fellows to be leaders in transdisciplinary science” (salary + \$12,000 research expenses)

Max Kade Foundation Scholarship (2000–2001)

Competitive fellowship to promote German-US educational exchange (tuition fees + monthly stipend)

RESEARCH GRANTS

Singapore Ministry of Education Academic Research Fund Tier 2 (2022–2025)

“Designing mobile-friendly cartograms for visualising geospatial data” (S\$ 649,480)

Yale-NUS Special Pockets Research Grant (2021)

“Automatic label placement in computer-generated cartograms” (S\$ 1500)

Yale-NUS Special Pockets Research Grant (2021)

“Topological colouring algorithm for cartograms” (S\$ 1500)

Yale-NUS Special Pockets Research Grant (2020)

“Implementing topology-aware cartogram software” (S\$ 1500)

Singapore Ministry of Education Academic Research Fund Tier 1 (2019–2022)

“Developing the web application go-cart.io for generating cartograms” (S\$ 86,811)

Yale-NUS Research Cluster Seminar Grant (2016)

S\$ 19,600 support for workshops and conferences

Yale-NUS Startup Grant (2016–2020)

S\$ 60,000 for research on networks and cartography

Building Global Engagements in Research (2012–2013)

Competitively awarded internal responsive mode funding at the University of Bristol (£ 3440 travel award)

Rackham Dissertation Grant (2005)

Awarded by the University of Michigan for exceptionally promising Ph.D. dissertation projects (tuition fees + monthly stipend)

 INVITED POSITIONS

DEC 2018 – OCT 2018	Hungarian Academy of Sciences (Budapest): Visiting Senior Research Fellow <i>Center for Social Sciences, RECENS research group</i>
MAY 2008 – JAN 2008	University of New Mexico (USA): Visiting Postdoctoral Researcher <i>Department of Computer Science</i>

 SEMINARS, CONFERENCE PRESENTATIONS AND WORKSHOPS

Keynote Speech

DEC 2018	<i>A fast flow-based algorithm for creating density-equalizing map projections</i> 3rd Asia-Pacific Conference on Complex Systems Design and Management, Singapore
----------	--

Other Invited Talks since 2016

JUN 2021	<i>Cartograms for spatiotemporal visualization</i> Workshop on Data Science and Curation: Spatial Data Science, Indian Sta- tistical Institute, Bengaluru
JUN 2021	<i>Cartograms: the past, the present and the future</i> Colloquium, Institute for Geography, University of Augsburg, Germany
OCT 2020	<i>Conveying geospatial information with contiguous area cartograms</i> Seminar, Biology Department, Hong Kong Baptist University
MAR 2020	<i>Cartograms: geographic maps reimaged</i> Seminar, Computer Science Department, University of Iceland, Reykjavik
FEB 2020	<i>Bringing cartograms to the masses</i> Complexity Community Sharing Session, Nanyang Technological University, Singapore
JAN 2020	<i>Contiguous area cartograms</i> Seminar, Geography Department, University of Zurich, Switzerland
OCT 2019	<i>Contiguous area cartograms for data visualization and analysis</i> Satellite meeting: Extracting and analysing networks from spatio-temporal data, Conference on Complex Systems, Singapore
SEP 2019	<i>Network analysis with R</i> Workshop on Complex Networks and Persistent Homology, National Univer- sity of Malaysia, Bangi
OCT 2018	<i>Consensus time in a voter model with concealed and publicly expressed opinions</i> Seminar, “Lendület” Research Center for Educational and Network Studies (RECENS), Hungarian Academy of Sciences, Budapest
OCT 2018	<i>Voter model with concealed and publicly expressed opinions</i> Complexity and Networks Group, Imperial College London, UK
JAN 2018	<i>A fast flow-based algorithm for creating density-equalizing map projections</i> Complexity Community Sharing Session, Nanyang Technological University, Singapore

SEMINARS, CONFERENCE PRESENTATIONS AND WORKSHOP (CONTINUED)

- DEC 2017 | *A fast flow-based algorithm for creating density-equalizing map projections*
Seminar, Complexity Science Hub Vienna, Austria
- JUL 2016 | *Density-equalizing map projections - the past, the present and the future*
Workshop on Cities as Complex Systems, Herrenhausen Palace, Hannover, Germany

Recent Contributed Conference Talks

- DEC 2021 | *Balancing Shape Distortions and Contiguity in Cartograms*
International Cartographic Conference, Florence, Italy
- OCT 2021 | *Task-Based Effectiveness of Interactive Contiguous Area Cartograms*
IEEE VIS: Visualization and Visual Analytics, virtual conference
- SEP 2020 | *Beyond Fortune 500: Women in a global network of directors*
NetSci, Rome, Italy
- DEC 2019 | *Mean consensus time of the voter model on networks partitioned into two cliques of arbitrary sizes*
Complex Networks, Lisbon, Portugal
- OCT 2019 | *Mean consensus time of the voter model on networks with two cliques*
Conference on Complex Systems, Singapore
- JUL 2019 | *go-cart.io: a web application for generating contiguous cartograms*
International Cartographic Conference, Tokyo, Japan
- SEP 2018 | *A voter model with concealed and publicly expressed opinions*
Conference on Complex Systems, Thessaloniki, Greece
- JUL 2018 | *Implementing a fast flow-based algorithm for creating cartograms*
Data Science, Statistics and Visualization, Vienna, Austria

 Shape and efficiency in spatial distribution networks
J. Stat. Mech. Theory Exp. 2006(1):P01015 (2006)
 DOI: [10.1088/1742-5468/2006/01/P01015](https://doi.org/10.1088/1742-5468/2006/01/P01015)

APPENDIX: COMPLETE PUBLICATION LIST (CONTINUED)

M. T. Gastner, C. R. Shalizi and M. E. J. Newman
 Maps and cartograms of the 2004 US presidential election results
Adv. Complex Syst. 8(1):117–123 (2005)
 DOI: [10.1142/S0219525905000397](https://doi.org/10.1142/S0219525905000397)

M. T. Gastner and M. E. J. Newman
 Diffusion-based method for producing density-equalizing maps
Proc. Natl. Acad. Sci. U.S.A. 101(20):7499–7504 (2004)
 DOI: [10.1073/pnas.0400280101](https://doi.org/10.1073/pnas.0400280101)

Peer-reviewed long conference papers

S. Tingsheng, I. K. Duncan, Y.-N. Chang and **M. T. Gastner**
 Motivating good practices for the creation of contiguous area cartograms
 in T. Bandrova et al. (Eds.), *8th Int. Conf. Cartogr. GIS*, vol. 1, pp. 589–598
 (Bulgarian Cartographic Association, Sofia, 2020)
 ISSN: 1314-0604

A. Evtushenko and **M. T. Gastner**
 Beyond Fortune 500: Women in a global network of directors
 in H. Cherifi et al. (Eds.), *Complex Networks and Their Applications VIII*
 Proc. 8th Int. Conf. Complex Networks and Their Applications, vol. 1, pp. 586–598
 (Springer, Cham, 2020)
 DOI: [10.1007/978-3-030-36683-4_47](https://doi.org/10.1007/978-3-030-36683-4_47)

M. T. Gastner and C. Ducruet
 How heavy-tailed is the distribution of global cargo ship traffic?
10th Int. Conf. Signal-Image Technology & Internet-Based Systems, pp. 289–294 (2014)
 DOI: [10.1109/SITIS.2014.33](https://doi.org/10.1109/SITIS.2014.33)

M. T. Gastner
 Traffic flow in a spatial network model
 in A. Minai, D. Braha and Y. Bar-Yam (Eds.), *Unifying Themes in Complex Systems*,
 pp. 315–322 (Springer, Berlin, 2010)
 DOI: [10.1007/978-3-540-85081-6_40](https://doi.org/10.1007/978-3-540-85081-6_40)

H. Youn, **M. T. Gastner** and H. Jeong
 Inefficiency in networks with multiple sources and sinks
 in J. Zhou (Ed.), *Complex Sciences*, pp. 334–338 (Springer, Berlin, 2009)
 DOI: [10.1007/978-3-642-02466-5_32](https://doi.org/10.1007/978-3-642-02466-5_32)

M. T. Gastner
 Shape and efficiency in growing spatial distribution networks
2nd Eur. Conf. Complex Systems, pp. 82 (2006)
